

ITERCON returns to Data Centre World'25 under the label CYCLUS GROUP

- The global operator specialized in design and construction of data centers is participating in the Madrid exhibition with a new stand that highlights its identity as part of the CYCLUS Group.
- The company will also be present in the conference area of the leading data center trade fair, sharing its expertise in high-performance critical infrastructures.

Valencia, Friday 17th of October 2025 — CYCLUS Group, a benchmark in comprehensive services for the construction lifecycle, will be exhibiting at the upcoming edition of Data Centre World Madrid, taking place on October 29 and 30 at the IFEMA exhibition center.

The event, a leading reference in the data center sector, has become a key date for the business group. After participating in previous editions through its brand ITERCON, global operator in design and construction, the group will attend the 2025 edition for the first time under the CYCLUS Group visual identity.

Manuel Marin, Group's operating companies CEO, states "being present at Data Centre World is a strategic move for us. The exhibition offers the perfect opportunity to showcase the Group's capabilities as a key player in the development of critical infrastructure, while also strengthening relationships with clients and partners. We invite all attending professionals to visit our stand and discover our solutions for last generation data centers."

Within the exhibition, CYCLUS Group's stand will be located in **Hall 7 – Stand E62**. There, visitors will have the opportunity to speak directly with the group's professionals leading data center construction projects both nationally and internationally.

In addition, the showcase CYCLUS group's track record in critical infrastructure, will be screened in a video summarizing its experience in designing and executing efficient and sustainable data centers.

Challenges and opportunities inside data centers constructions

The business group will also move forward as it will take part, for the first time, in the events conference program. Juan Ballester, Data Centers Operational Manager at ITERCON, part

of the CYCLUS Group, will deliver a talk titled “From Design to Operation: Challenges and Opportunities in Data Center Construction” on October 30 at 11:30 AM.

During his intervention, he will address technical, logistical and operational challenges involved in data center construction, as well as the added value of the high level of expertise required for its execution, an incentive for companies looking to embrace the technological challenge.

About CYCLUS Group

CYCLUS Group is an international benchmark in the construction sector, specializing in the land management projects, design, execution of works, maintenance, and renewable energy. Its mission is to provide comprehensive services to both public and private clients through innovative, sustainable, and technologically advanced solutions.

The groups is composed by three companies —ITERCON, SERVITRIA, and ALONDRA— as well as several affiliated firms, bringing together a multidisciplinary team formed by 500 professionals. This structure enables CYCLUS Group to undertake complex construction and consultancy projects, oriented to technical excellence, close client collaboration, and continuous improvement.

Thanks to its operational capacity and extensive experience in the sector, CYCLUS group has a solid client portfolio, including leading companies in industries such as data centers, automotive, logistics and civil engineering.
